

BrightSign® XD6

Exceptional 4K video and graphics performance - Deployable anywhere.

BrightSign XD6 leverages the flexibility of Power over Ethernet (PoE+) to deploy high-performance 4K graphics and stream profoundly captivating 4K video - anywhere.

Immersive Engagement

Dynamic and responsive interactions.

- Responsive multi-touch engagement
- Immersive sensor & light controls
- Robust 2D motion graphics

Centerpiece Visuals

4K visual impressions.

- Striking 4K60p video
- Dual 4K video decoding
- Full HD and 4K video rotation

Interactive Journeys

Versatile and unique experiences.

- Personalized engagement
- Usage tracking & analytics
- Measurement & data integrations

Deploy Anywhere

Set up creative and high-performance installations

- Power the player and peripherals via PoE+
- 4k graphics support
- 4K IP Streaming

XD236

Standard I/O Package

Seamless 4K graphics and pristine 4K 60Hz playback, complemented by PoE+, additional internal memory for complex applications, and the option of secure SSD storage.

XD1036

Expanded I/O Package

Expands connection and engagement options with serial along with USB-A and USB-C ports.

The BrightSign XD6 Advantage

- Deploy high-performance and creative experiences anywhere using the flexibility of PoE+
- Stellar 4K or dual 4k video, ideal for on-screen and projected displays, and support for 10-bit HDR
- Deploy immersive and captivating 4K graphics
- Expandable internal storage via an M2 interface SSD storage option
- Operate with unparalleled reliability, security, and sustainability on BrightSignOS™
- Reduce total cost of ownership with complimentary remote player management and controls
- Achieve CMS choice flexibility with a trusted global network of leading integrated partner solutions
- Leverage an integrated Neural Processing Unit (NPU) which enables BrightSign players to run powerful AI applications without compromising on video or graphics performance

BrightSignOS™

The power of purple.

BrightSignOS is a purpose-built operating system designed exclusively for digital signage, delivering unmatched reliability, security, and performance for always-on environments. Unlike general-purpose operating systems, it is engineered to support dedicated, long-term, and consistent signage experiences at scale.

RELIABLE. Engineered for continuous operation for always-on performance you can trust.

- Automatic fault detection and self-healing protocols for recovery without intervention
- Remote diagnostics and controls to reduce costly on-site visits
- Supports replaceable storage and fixed memory is available on BrightSign players

FLEXIBLE. Supports 200+ CMS partners, open APIs, and built to be adaptable to any use case, today and tomorrow.

- 200+ CMS partner integrations without switching hardware
- Supports AI at the edge via integrated Neural Processing Units (NPU) on BrightSign players
- Used in a wide portfolio of players and built-in SoC solutions for any use case

SECURE. Security is embedded at every layer, in addition to secure boot, and a small attack footprint.

- Runs only BrightSign-approved code and extensions
- Configurable to any type of security profile
- Long-term OS patching and updates (5+ years)

SUPERIOR. Deliver stunning visuals with high-quality video and graphics.

- Enables 4K and 8K video playback with high-fidelity graphics
- Synchronized multi-player support for video walls and multi-screen installs
- Highly extensible to securely run specialized signage technologies

VALUE. Lower total cost of ownership and free built-in device management.

- Industry-leading 5-year warranty
- Free device management is included with every player
- Remote diagnostics and monitoring reduce costly on-site visits

SUSTAINABLE. Stay relevant longer with energy-efficient hardware, intelligent display control, and remote management.

- Supports low power consumption with intelligent off-hours display control
- Optimized for media playback and device control
- Purpose-built OS without unnecessary software or processes

Invest in BrightSignOS to achieve long-term success

Designed to reduce risk and save on signage.

Downtime is the most expensive investment in signage that often gets overlooked. Failure doesn't happen at implementation, it happens after. BrightSignOS™ is designed to solve and mitigate ongoing risks to avoid rip and replace situations resulting in huge savings throughout the long life of your player.

TOTAL COST OF OWNERSHIP

Hardware Specifications

- USB Type C port: supports high-speed host mode & provides 5V/1A power to peripheral devices
- USB Type A port: provides 5V/1A power to peripheral devices
- GPIO port: 8 bi-directional GPIOs
- Audio port: supports analog & SPDIF digital
- Real time clock: 14-day life

Software & Services

A scalable cloud infrastructure that securely connects BrightSign players to a suite of integrated services for remote device, content, and network management.

BrightSign® CONTROL Free remote player monitoring and control service.	BrightSign® CONTROL PLUS Fleet management service with bulk operations, remote diagnostics, AI-powered assistance, centralized scheduling at scale, and network management.	BrightSign® AUTHOR Free software to provision players, access BrightSign Author Plus, and connect to a variety of partner CMS solutions.	BrightSign® AUTHOR PLUS Complete cloud-based CMS for scalable, centralized content management across distributed digital signage networks.	Partner CMS Solutions Flexible choices with seamless player integrations.
--	---	--	--	---

Together, BrightSign Control Plus and BrightSign Author Plus deliver the full advantages of intelligent fleet management with a modern cloud CMS solution to remotely manage devices, and publish content — no matter where you are.

Technical Specifications

	XD236	XD1036
I/O Package	Standard	Expanded
AI Enablement		
Neural Processing Unit (NPU)	√	√
Video & HTML5 Engines		
4K video decoding	Dual 10-bit at 60p	Dual 10-bit at 60p
Full HD at 60p video decoding	√ (dual)	√ (dual)
4K video rotation	√	√
HTML5 Performance	Smooth full screen 2D WebGL motion	Responsive multi-touch 2D WebGL
HTML support: HTML5, CSS, JavaScript, SVG, WebGL, and Chromium compatible	√	√
Supports 4K IP streaming	√	√
