

Heavy-duty rail-based wall mount
Supports two 55"-75" displays in landscape
SWL 120 kg (265 lb) in total
Camera shelf included
12 degree downward tilt

Designed for AV integrators serving Quick Service Restaurant (QSR) customers, this wall rail mount kit is expandable and user-friendly.

Components included:

SWL 120 kg

This product utilizes heavy-gauge components to support the weight. The weight of all displays combined cannot exceed this.

Three cartons

This kit contains several different products combined for this application, so it will arrive in three cartons. If you need a different combination you can order each part separately.

Three Wall Brackets

The wall brackets have an adjustable reach to allow for walls that aren't perfectly flush. They slide easily along the rail, making it simple to anchor the rail to a load-bearing structure in the wall.

Camera Shelf

The setup includes a camera shelf that can hold a camera above, below, or between the screens, making it a convenient way to position security monitoring for the point of sale area. It supports a full size camera like Logitech's Rally, or leave the platform off to fix a smaller USB camera like Logitech's Brio.

2 x Displays

This kit is designed for two 55" to 75" landscape displays. We have a variety of other kits available, so if you're looking for something different, just search VFM-MNU/P above.

2400 mm Wide Rail

The aluminium rail comes in three sections, each 800 mm wide, with joiners fitted into the top and bottom grooves. It can be extended as needed.

SPECIFICATIONS

VFM-MNU/L2X75 Menu Board Mount Kit - Landscape 2 x 55-75"
